3.1 Picture of open module showing radio card and POE splitter, with cabling

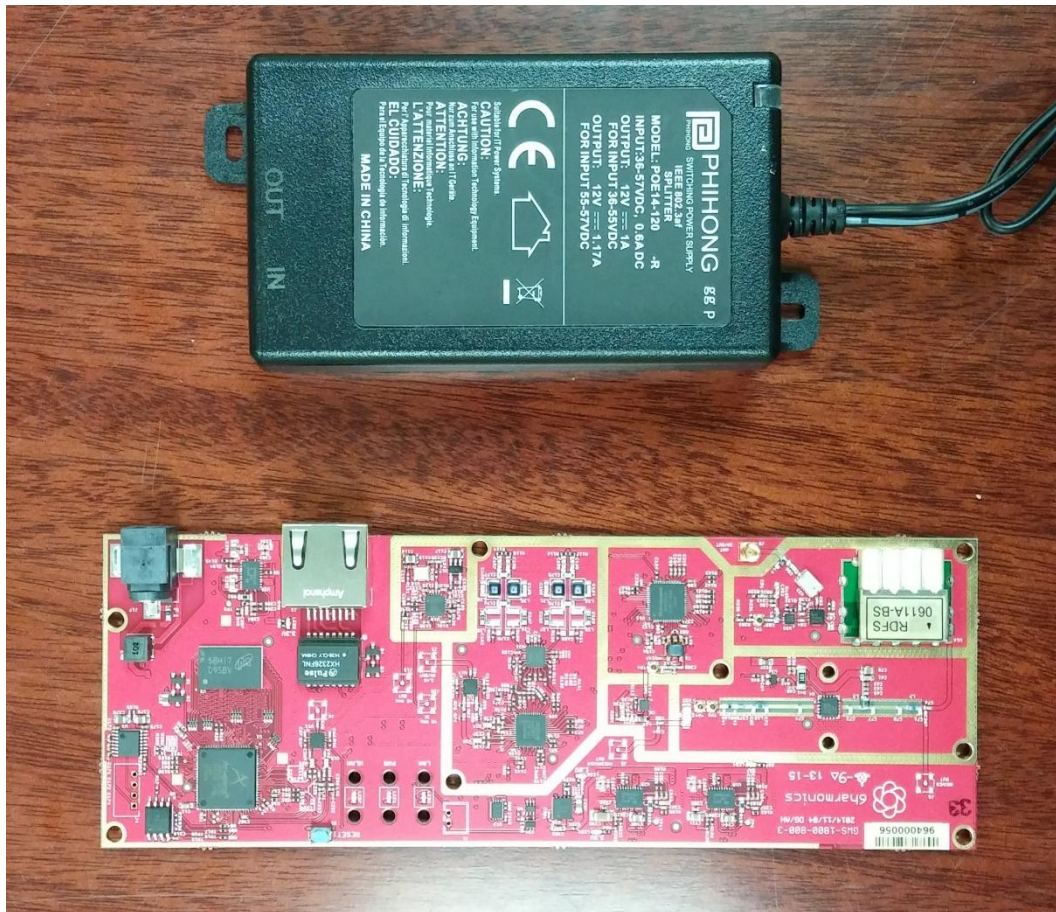

The GWS-4006-17 is a single card radio module. The card contains all RF and modem circuitry. The packaged module is a commercial POE splitter from PHIHONG, model POE14-120.

There are 4 cables in the module:

- a) RF cable from the card to the antenna connector
- b) RJ45 Ethernet cable from the external connector to the PHIHONG POE splitter.
- c) RJ45 Ethernet cable from the PHIHONG POE splitter to the radio card data connector.
- d) 12V power cord from the POE splitter to the radio card.
